

Excel Basics:

Questions and Answers:

Q1. Difference between Relative, Absolute, and Mixed Cell Referencing

Ans.:

- **Relative Reference:**

Changes when copied to another cell one by one. Example: If A1+B1

- **Absolute Reference:**

Fixed reference does not change. Example: \$A\$1+\$B\$1

- **Mixed Reference:**

Combination of Relative and Absolute references where one cell will be relative and another will be Absolute. Example: \$A1+B\$1
